

H1002: Web User Experience & Database Design

Lab 1:

Lab Assessment

- You must present your work to the lecturer in person before leaving the lab.
- Then submit your work on Brightspace by the due date provided on Brightspace.
- Work not presented in person will not be graded, even if it is submitted.

Activities:

Get to Know Your Classmates (5 mins) 🖐️

1. Find at least 3 people sitting near you.
2. Introduce yourself and ask for their names.

For the lab work today

For each of Donald Norman's design principles, **explain the definition and provide one example with a screenshot** that demonstrates the principle.

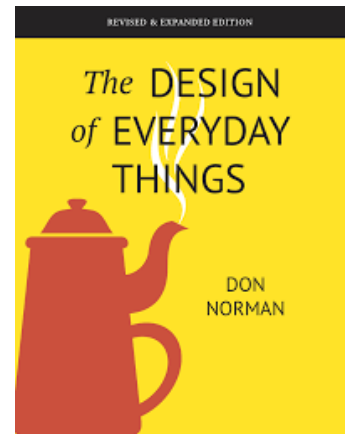

Instructions:

- Create your work in a PowerPoint (PPT) file.
- On the first slide, write down the names of the 3 classmates you met.
- Save your work as a PDF before submitting on Brightspace.
- **Submit your PDF file on Brightspace by the due date.**

Note: When identifying and explaining the design principles, please refer to Design Principles by Donald Norman (2013) or use the provided book on Brightspace as your reference.

Design principles by Donald Norman (2013)

- Visibility
- Feedback
- Affordance
- Signifier
- Mapping
- Consistency
- Constraint

PS. This UI principle is useful for your individual work

Note: I will check your attendance today only if you show me your work before leaving. Submit your PDF file on Brightspace by the due date.
